

The Society for Clinical Neuropsychology

Division 40 of the American Psychological Association

Mission: Provide a scientific and professional forum for individuals interested in the study of brain-behavior relationships and its clinical application, development of quality standards of professional training/practice, and advocacy for neuropsychology.

Students

Why should a Student belong to this division?

{Membership in the Society for Clinical Neuropsychology provides opportunities to:}

- Benefit from a student-focused forum (Association of Neuropsychology Students in Training) that offers access to informational resources specific to training and professional issues in clinical neuropsychology
- Obtain mentoring and career guidance
- Participate in professional networking events
- Access scholarships for graduate students in neuropsychology
- Promote leadership development and committee involvement
- Benefit from student-focused programming at the APA Annual Convention
- Participate in student-focused social media and listserv

Early Career

Why should an Early Career Psychologist belong to this division?

{Membership in the Society for Clinical Neuropsychology provides opportunities to:}

- Keep abreast of current clinical practice and training issues, professional standards in neuropsychology and trends in research
- Participate in professional networking and mentorship activities
- Promote leadership development with opportunities in various Division and APA committees
- Keep informed about awards recognizing early career achievements and scholarly research
- Benefit from early-career focused programming at the APA Annual Convention
- Participate in early-career focused social media and listserv

APA Members/Associates/Fellows

Why should a Member/Associate/Fellow belong to this division?

{Membership in the Society for Clinical Neuropsychology provides opportunities to benefit from:}

- Access the latest information regarding clinical practice and training issues, professional standards in neuropsychology and trends in research
- Support advocacy for our profession at state and national levels through the power and visibility of APA
- Help increase public awareness of our unique healthcare contributions as neuropsychologists
- Promote evidence-based practice and its scientific foundations and quality training for future neuropsychologists
